#NEW Pneumonia confirmed cases # [# 1 new confirmed case in Ningxia #] Ningxia added 1 confirmed case at 0-24 on January 25; as of 24 January, 4 confirmed cases were reported in the district 1. There were 1 suspected case and 189 close contacts. They were all isolated and observed at home. No abnormalities were found.

New confirmed cases: Yan, male, 33 years old. He stayed in Wuhan for 11 days from January 11 to 22 and returned to Yinchuan on the 22nd. Fever, sore throat and other symptoms appeared that day. He went to Yinchuan No. 1 People's Hospital in the afternoon on the 24th and was tested positive for the new type of coronavirus by the CDC in the early morning of the 25th. The diagnosis and treatment of pneumonitis caused by a novel coronavirus infection in the autonomous region was evaluated and confirmed as a confirmed case of pneumonitis infected by a new coronavirus. At 9 am on the 25th, he was transferred to the Fourth People's Hospital of the autonomous region for centralized treatment. At present, the patient's chest CT scan is normal. Isolation, antiviral and symptomatic treatment are given. The case was investigated and 52 close contacts were identified, all of whom were isolated for medical observation at home.

Reminder from the Health and Health Committee of the Autonomous Region: As of 19:00 on January 25, 2020, the Autonomous Region has upgraded the current level of emergency response for prevention and control of pneumonia caused by new-type coronavirus to a level I emergency response level. All persons who have entered Ningxia since January 8th, including those from other places and those who return to Ningxia from this district, must immediately report to the local villages, streets, and community agencies for registration. If you notice any discomfort, take personal precautions and visit a medical institution for a fever clinic. At the same time, it is necessary to maintain indoor ventilation, wash hands frequently, and try not to move in crowded places. (CCTV reporter Zhao Qianjiang Niu Qiaogang)

waiker yerik is proud to take a step forward : we are in the Ningxia Hui Autonomous Region, the most densely populated place in the country, but the Han population is more than the Hui. In addition, the Hui people on our side live in unity and harmony.

Yuzai Yoga : It 's not enough for you to visit our living room to study our Ningxia history. You control our Hans and Huis, and take care of them yourself

Han Qing Mo Mo_

Once again I advise those masks, disinfectant vendors and sellers, you choose to raise money at this time, it is really difficult to make money 🙄🙄🙄

100,000 volts Thunderboy : It 's just a matter of increasing the money. The n90s I bought on Taobao are fake and have been reported. No feedback yet. Do n't buy masks in Taobao 's "far labor insurance".

MrY_Duan Duangu Liang : Yesterday I saw a message that seemed to say that if the price of mask disinfectant manufacturers can increase, you can call 12315 to report

Acid

Our little Ningxia did n't want to go on a hot search, just wanted to be quiet and peaceful

Attached four-point rest : Great Xinjiang, where we have not been attacked by SARS, doesn't want to

Tomato frame : 🤔 Ningxia was all right at the time, I believe it will be all right this time

太乙真人说我是炼丹的不二人选_

宁夏已经不错了，公交车消毒，大喇叭循环宣传，各个娱乐场所都基本关门了，政府还补贴餐饮服务业，希望数字不要再上升了🙏

🙏宁夏平常没有什么大新闻 安安静静像世外桃源一样既宁静又惬意 很适合养老和生活 城市面积不大 人口也不多 一旦病例数目开始增加 对于这里来说 我觉得比大城市的扩散性更快 听说今年上级很多领导也都没有回老家过年在紧急做这些补救措施 这个时候我们要相信政府🙏希望大宁夏挺住！！

Meow Meow

The natural host of the new coronavirus disease is the Chinese horseshoe bat or chrysanthemum bat. In the process of transmission from bat to human, the host medium is likely to be snake or mink. According to studies on SARS-CoV and MERS-CoV, coronavirus is sensitive to heat. Keep at 56 ° C for 30 minutes. Ether, 75% ethanol, chlorine Disinfectants, lipid solvents such as peracetic acid and chloroform are effective inactivating the virus. Anti-AIDS drugs have proven effective against the virus.

Su Xiaomeow : Too many people take it lightly and take it seriously, game wind blooms everywhere, and the breeding bacteria also expands with the interests of merchants. This has something to do with government inaction.

Xi Mo Li Liu Su : However, Academician Zhong mentioned it as early as during the SARS period! Also specifically talked about Wuhan! As a result, do n't you still think nobody cares!
