Domestic outbreak status of new coronavirus

-Further investigation confirming contact propagation case-

□ The Centers for Disease Control and Prevention (CEO Eun Eun-kyung) conducted a diagnostic test on a total of 371 suspected cases as of 9 am on February 1, 20, and confirmed 12 patients and released 289 voices. , 70 said the test is in progress.

The status of confirmed patients is generally stable, and the fourth patient continues to treat pneumonia in a stable condition.

<Domestic Declaration and Management Status (As of September 09, 2009)>

division	sum	Confirmation 1) patient	Bequest Box 2)		
			system	In isolation	Isolate
Cumulative (1.3 ~ 2.1)	371	12	359	70	289

1) Confirmed as a new coronavirus infected person by combining clinical symptoms, travel history, and test results

2) Bequest box deemed necessary for containment and inspection in consideration of clinical symptoms and travel history (including medical patients)

465 contacts are being monitored continuously, of which 4 have been confirmed as patients (1 in 3, 1 in 5 and 2 in 6).

☐ The Centers for Disease Control and Prevention (CEO Eun-Kyung Jung) announced the progress of further epidemiological investigations to date among the fifth to eleventh patients.

☐ The number of contacts for the fifth confirmed person (33-year-old male, Korean) has been confirmed so far, 29 of them have been confirmed, and one of them has been confirmed and admitted to Seoul Medical Center.

-Patients visited restaurants, supermarkets and wedding shops by bus after symptom onset and completed environmental disinfection of buses, restaurants and supermarkets that stayed for a long time. (See Attachment)

○ The number of contacts for the sixth confirmed (55-year-old male, Korean) has been confirmed to date, and two of them have been confirmed and are admitted to Seoul National University Hospital.

The patient visited the church after the onset of symptoms, but was self-isolated after being informed as the third confirmed patient's contact on 27 January. Environmental sterilization was completed for the house and church where the patient stayed. (See Attachment)

○ The number of contacts for the 7th confirmed person (28-year-old male, Korean) has been confirmed so far, and the contact is taking measures such as self-isolation. The patient was found to have stayed mainly at home after the onset of symptoms and further investigation is ongoing. (See Attachment)

The eighth confirmed patient (62-year-old female, Korean) developed myalgia symptoms during her stay in Wuhan, China on January 21. Visits and contacts after the onset of symptoms are being investigated.

The 9th confirmed (28-year-old female, Korean) was informed as the contact of the 5th confirmed by Jan. 30, and stayed at home after the onset of symptoms.

The 10th confirmed (52 year old female, Korean) and the 11th confirmed (25 year old male, Korean) were confirmed on January 31 as the family of the 6th confirmed. The tenth confirmed that they had headache symptoms on January 29, and the 11th confirmed that they had a sore body on January 30.

-The 10th and 11th patients visited the acquaintance's house and beauty salon together after the symptom onset of the 10th patient and completed the environmental disinfection. (See Attachment)

□ 질병관리본부 정은경 본부장은 “지역사회 전파를 차단하기 위해 조기발견이 무엇보다 중요하다”고 강조했다.

○ 최근 14일 이내 중국을 여행한 경우, 가급적 외부 활동을 자제하고, 손씻기 및 기침예절을 준수하는 한편, 발열과 호흡기 증상이 발생하는 경우 선별진료소가 있는 의료기관*을 방문하거나, 관할 보건소, 지역 콜센터(☎지역번호+120)또는 질병관리본부 상담센터 (1339)로 상담해줄 것을 당부하였다.

* 보건복지부 홈페이지 (www.mohw.go.kr, 상단배너 '선별진료소 운영 의료기관 명단보기'), 질병관리본부 홈페이지 (www.cdc.go.kr, 상단배너 '선별진료소')

○ 의료기관에서는 DUR(의약품안전사용서비스), ITS(해외여행력 정보 제공프로그램)를 통한 내원 환자 해외 여행력 확인을 철저히 해달라고 강조하고, 의심환자 진료시 마스크 등 보호구를 착용하는 등 “신종 코로나 바이러스 감염증 예방 의료기관 행동수칙” 준수를 다시 한 번 강조했다.

○ 일반 국민들도 손씻기 철저, 기침 예절 준수 등 일상 생활에서 감염병 예방수칙을 꼭 지켜달라고 당부하고, 의료기관에서 실시하고 있는 면회객 제한 등 감염관리 조치에도 적극 협조해 줄 것을 거듭 당부했다.

< 신종 코로나바이러스감염증 예방 국민 행동수칙 >

- 기침 등 호흡기 증상이 있을 경우 마스크 착용 (의료기관 방문 시 반드시)
- 후베이성 등 중국 방문 후 의심증상 발생 시 관할보건소 또는 1339 문의
 - 중국 여행력을 의료진에게 알려주기

< 신종 코로나바이러스감염증 예방 의료기관 행동수칙 >

- 호흡기 질환자 진료시 마스크 등 보호구 착용
- 의심되는 호흡기 질환자 내원 시 선별진료 철저 (여행력 문진 및 DUR 활용 등)
- 신종 코로나바이러스 감염이 의심될 경우 관할 보건소로 신고
